- 

## PROJECTS

- **BusyBuy Ecommerce web app React.js**

BusyBuy Ecommerce This project highlights my expertise in front-end development using React.js, state management with Redux, and seamless integration with Firebase for data storage and authentication. Led the front-end development efforts, creating an intuitive and responsive user interface using React.js. Implemented dynamic product listings, cart management, and user authentication flows

- **Placement web app using NodeJS, Express.js, EJS, MongoDB**

I have develop web app using NodeJS, Express.js, MongoDB , this is placement cell app develop for placement company able to schedule student interview download this file, check data student is interview with list of companies make backend with Nodejs, Express and front end using EJS, able to store data in mongoDB for student data and company data store
